

LabPrints

~Bringing pixels to life

All Deluxe Digital prints are corrected to North American's high standards of quality. For best results, files should be properly exposed and white balanced. They will be adjusted for color, density, gamma, contrast and saturation within the limits of the data you provide.

These products and prices are only available within the LabPrints software sent via broadband or CD.

Additional options are available within the program, B&W, Sepia, Brown tone prints. [Metallic paper is available in its own catalog for an additional 25%.](#) You can also order canvas mounts, spray finishes, retouching and art. Die cut and Gold/Silver stamping are free on 8-up wallet units.

LabPrints

Instructions and training takes about one half hour - available at our web site www.naphoto.com - North American Photo is an ICC color managed lab

For all additional services go to www.labprints.com
